Matt Klaasse

1) It allows automated testing of web pages and can be used to test compatibility with different web browsers. It is also integrated directly into the web browser making testing extremely easy.

2) Selenium ties up your web browser while its tests are being run.

3) `<tr><td><a href="myCase.html">MyCase</a></td></tr>`

4)
```
<tr>
     <td>click</td>
     <td>//a[@id='myLink']/</td>
     <td></td>
</tr>
```

5) Adv: It can be displayed natively in the web browser

 Dis: It is not very intuitive compared to other types of testing
